Wireframes and Test Scenarios

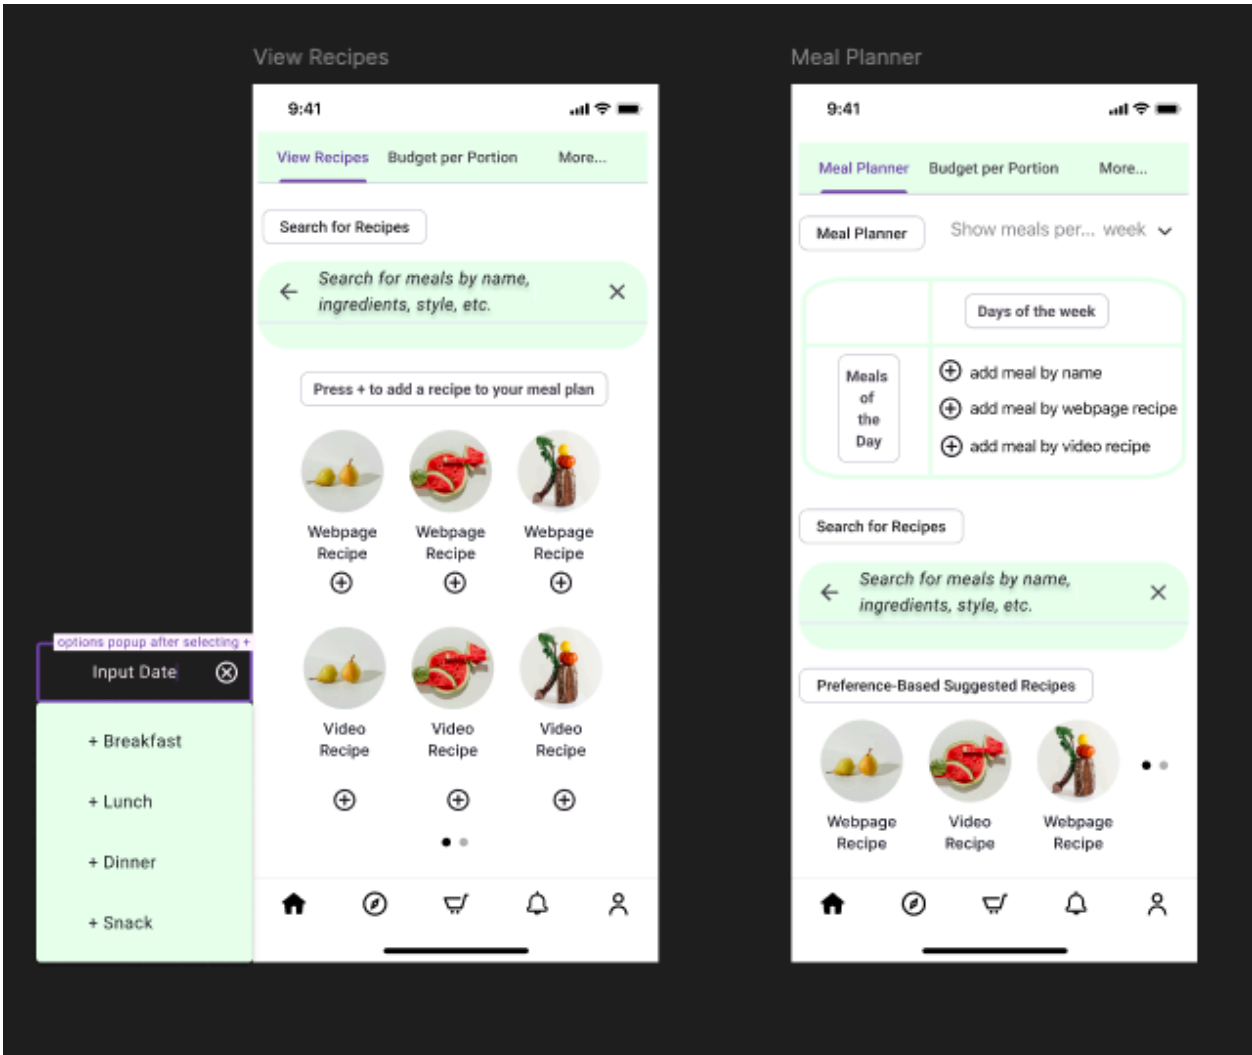

Test Scenarios:

1. User clicks on Weekly Meal Planner, displays meals, User quits
2. User clicks on View Recipes, Display Recipes, User clicks on a Recipe, Add to Meal Planner, returns to Meal Planner, User quits.
3. User inputs preferences, filters out the recipes that are not preferred. User quits.
4. Users input their preferences, as well as their Height, Weight, and estimate of exercise time. The system then adjusts the recipes to the recommended ones (utilizing AI) for display or addition to the Weekly Meal Planner.
